

Digging Tools
THE TOOLS TO TRUST

Spear & Jackson
Since 1760

Digging Tools Range

No one demands more from their tools than the professionals who work in environments where performance is a must. At **Spear & Jackson**, we have been supplying contractors with reliable, professional-quality hand and groundwork tools for over 250 years.

A photograph of a wire mesh gate in a field with trees in the background. The gate is made of metal mesh and is partially open. The background shows a lush green field with tall grass and several trees, including a large one with a thick trunk on the left. The sky is visible through the trees.

Digging Tools

A range of digging tools as tough as Australian contractors

Australian contractors choose Spear & Jackson because they know our tools can be trusted to give outstanding performance in tough onsite conditions, day after day, year after year.

Our professional tools are designed to the highest international quality standards and are developed through unique insights into what the trade really needs. We've done extensive research in each of our international markets to make sure our specialist tools look, feel and work right every time.

So, when a tradesman reaches for a Spear & Jackson tool, they know it's a tool they can trust. No wonder thousands of contractors, ground workers, Local Authorities and Utilities around the world rely on Spear & Jackson professional hand and groundwork tools to get the job done.

Your customers demand the best, offer them the best - Spear & Jackson.

Handle Types

Plastic

Fixed with waterproof adhesive and steel pins.

Rounded Timber

Lacquered for weatherproofing.

Ergo Soft Grip

TPE/PP Soft Grip D-Handle, ergonomically tilted.

Rubber Grip

Fixed with waterproof adhesive.

Metal

Rotary welded to ensure perfect alignment of weld.

MYD

Fixed with waterproof adhesive and steel pin.

Shaft Types

Timber

Hardwood varnished shaft for comfort in use.

3mm Fibreglass

A strong, lightweight and durable material with steel core insert.

Oak

Oak shaft for maximum strength and comfort in use.

3mm Fibreglass

A strong, lightweight and durable material with steel core insert and rubber centre grip.

Tubular Steel

Strong all steel shaft.

Solid Core

A strong, lightweight material with solid fibreglass insert & rubber centre grip.

Digging Tools Specifications

Head Types - Some ranges feature treaded heads for more comfortable digging

Square Mouth

Ideal contractors shovel for shovelling out and refilling trenches, mixing concrete and moving tarmac.

Post Hole

Ideal for digging and clearing deep holes and pits, fencing and shallow trench digging.

Round Mouth

Ideal for shoveling gravel and other loose materials. The pointed blade gives easier ground penetration.

Trenching

A general trenching shovel ideal for narrow work such as pipe and cable laying.

Draining Tool

A long narrow blade makes this tool ideal for digging trenches in terms of width and depth. Useful for digging cable, pipe and drain channels.

General Purpose

Ideal for shoveling soils, sand & garden materials.

Plumbers

Ideal for digging drains & holes. It is a narrow shovel that can be used for laying pipe, general shifting & spreading.

Garden Spade

Ideal for digging and turning over soil in garden beds.

Cottage Spade

Ideal for digging and turning over soil in borders and between plants.

Garden Fork

Ideal for digging, cultivating & turning over soil.

County Range

The combination of the heavy duty carbon steel heads and hard wearing timber or fibreglass shaft make them the ideal choice for gardeners and DIY users. This range is great value for money without compromising on quality, durability or appearance.
