

EC-ERH14, EC-ERH12 & EC-ERH38

1/4, 3/8 & 1/2" Square Drive Ratchet Handles

RRP **\$19.98** **\$24.98** **\$39.98**

Barcode: 5012095629979, 5012095629986 & 5012095629993

Tooth Count

- Eclipse Ratchet Handles have 72 teeth on the drive gear, requiring just 5° of handle movement to engage the next tooth.
- Higher tooth count reduces the amount of handle movement needed to apply torque, making fastening and unfastening quicker and easier.
- Less handle movement is beneficial in tight spaces, allowing you to work in confined areas where larger swing arcs would be impractical.
- The design optimizes performance by enabling efficient removal or installation of fasteners with minimal effort.

Drive Size

- Both metric and imperial (SAE, A/F) sockets are available in three drive sizes: 1/4", 3/8" and 1/2"
- Each requires a different sized ratchet, and other accessories like extensions.
- Smaller sockets typically use smaller drive sizes, while larger sockets use the larger drive sizes
- Most socket sets include adaptors, so that different sized ratchets, sockets, and accessories can be used together when connected using the adaptor

Features & Benefits

- Eclipse Ratchet Handles are made from **Chrome Vanadium** – chromium and vanadium both make the steel more suitable for hardening, and chromium helps resist abrasion, oxidation, and corrosion.
- The button on the ratchets head is a **quick release** feature, used for quickly removing the socket or accessory
- **Ergonomic handle for ease of use and knuckle clearance when in use**
- Soft feel handles are comfortable & easily cleaned
- Packaged against a **retail-friendly hanging clip**
