

Brickworking Tools  
**THE TOOLS TO TRUST**

*Spear & Jackson*  
Since 1760

## Craftsman-made quality for over 200 years

Craftsmanship quality dating back to 1760, our Builders' Tools range has developed over time to meet the current needs of modern-day building. With three different ranges available, we provide the perfect tools for every budget and customer, be it professionals or home DIYers.

# Brickworking

## Trowel Anatomy

When using a tool, it's important to know the parts of the tool and how they work. Knowing the parts of a brick trowel and their uses will help you make the best choice of which trowel to use.

**“Pattern”** is an industry term used to describe the shape of a Brick Trowel's blade.

### Philadelphia Pattern

have a wide blade profile designed to hold more mortar making it easier to lay larger building materials like stone, that require more mortar than brick.

### London Pattern

have a narrow blade profile, and a rounded heel. Used in our smaller pointing trowels. Ideal for filling in small cavities and repairing crumbling mortar joints.

### Broad Heel Pattern

was designed for Australian market with a broader heel than the London Pattern, to take more mortar for laying cement/bessa blocks.

## Craftsman-made quality since 1837

**Tyzack is one of the oldest builders' tool brands, founded in 1837 by Joseph Tyzack & Sons.**

By expertly combining advanced design, technology and our commitment to quality, Spear & Jackson offers a comprehensive range of superb Tyzack brickwork tools.

Each of our trowels is crafted from the finest carbon steel with a solid forged blade and through tang for supreme strength. Handles are available in both traditional wood or the latest soft-feel material with ergonomic design.

**TYZACK is the first choice for ultimate comfort and performance.**
